

Services

- ◆ High-volume **microtiter plate coating**
- ◆ Antibody and antigen **production** and **purification**
- ◆ **Immunogold** reagents for rapid test system applications
- ◆ Bulk and custom **magnetic particles**
- ◆ **Receptor binding assays**, including bulk coated plates
- ◆ **ELISA** assay development
- ◆ **OEM manufacture** of kits, solutions, etc.

Capabilities

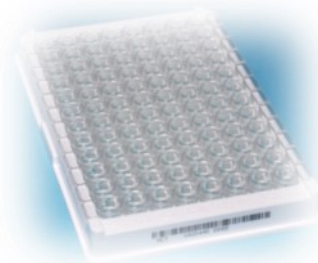

- ◆ Diversified test format (magnetic particles, microtiter plates, coated tubes, strip tests, etc.)
- ◆ GLP documentation of product development and validation processes
- ◆ Quality manufacturing to your specifications, time and time again
- ◆ Data evaluation options, from screening to fully quantitative configurations
- ◆ Design and validation of methods for sample matrices including foods, soils, biologicals, etc.

For nearly 20 years, Abraxis has been developing, manufacturing, and marketing rapid environmental, food, and life science test systems, including immunochemistry products and methods, to meet the testing needs of research and industry. We are constantly collaborating with global government, industry, and academic leaders to develop innovative methods and applications. Many of our products are validated/verified by agencies such as , US EPA, USDA, USGS, FDA, the Japanese Ministry of the Environment, and WHO.

Our scientific staff has experience with medical, industrial, and environmental testing. We are able to customize programs to serve the client's specific needs with competitive pricing and high quality standards. Abraxis is headquartered in the United States and serves our customers, directly or through distributors, in over 100 countries around the world.

Service Highlight

High-volume Microtiter Plate Coating

Abraxis staff have decades of experience coating surfaces with antibodies, receptors and other analytes, optimizing coating density, and maximizing stability. With a capacity of 2000 microtiter plates per run and features such as liquid level sensing, bubble sensing, and bar code printing, we can complete your job quickly and to your specifications.

- ◆ Proteins / Receptors
- ◆ Antibodies
- ◆ Protein A / Protein G
- ◆ Glutathione
- ◆ Peptides
- ◆ Nucleotides
- ◆ Streptavidin / Biotin

ABRAXIS, Inc. 124 Railroad Drive, Warminster, PA 18974
